Products

Open the door to a whole new world
Stairs - Doors - Floors

Contents

Heritage manufactures a wide range of solid hardwood products in our UK factories. We are the UK's largest manufacturer of solid hardwood doors, with over 30,000 doors and 40,000m² of flooring supplied every year and growing. Our stair range includes many innovative and new products and we are specialists at manufacturing quality joinery products at market leading pricing.

Many of our products are supplied off the shelf, however as a UK producer, we can tailor many of our products to suit our customers exact requirements.

Our sales and production teams are experts in working with one off items and we work closely with you to make sure you get what you need, quickly, cost effectively and made correctly. Best of all you can enjoy the knowledge that your product is a unique item, made just for you.

Call in to your nearest stockist to find out more details on how Heritage can help to transform your home.

4-7 Internal Doors

From our top selling solid oak ledged doors, to bespoke internal hardwood designs, our range of doors will provide you with a tempting range to choose from.

8-9 External Doors

External mortice and tenon doors are carefully made in our UK workshops to traditional construction methods and will last a lifetime. Finished at 44mm thick in a choice of designs.

10-13 Stairpart Ranges

Our stair ranges cover pine and oak, along with prefinished stairparts, with all the major designs at market leading prices.

14-15 Stairparts Scala & Glass

Our Scala & Glass ranges offer contemporary solutions to your stairparts selection. With a subtle mix of metal, timber and glass components, you're sure to find a look that suits your home.

16-17 Stair Cladding

Our stair ranges covers pine and oak stairparts, along with modern metal and timber systems, with all the major designs at market leading prices.

18-19 Essentials Flooring

We also import and stock a range of the fastest selling engineered flooring styles at excellent prices. We deliver either to you or direct to site on your behalf to reduce your stocks.

20-21 Prestige Flooring

Heritage manufactures its own range of solid hardwood flooring. We can run any size in lengths up to 3.6m producing cost effective beautiful floors with the long lengths that customers love.

22-23 Shelving & Mouldings

We stock and manufacture a range of mouldings, covering all the fast selling lines and with the ability to manufacture to order in a choice of hardwoods.

About Us

Welcome to Heritage Products. We are one of the UK's foremost designer and manufacturers of doors, floors and staircase parts.

Heritage have been producing fine quality interior timber products for your home for over 20 years. Our philosophy is to bring you beautiful solid hardwood products, manufactured where possible at our factories in the UK, that will enhance your home for generations to come. We use the latest design techniques to visualise and perfect new products and ideas, but we never lose sight of the importance of the care and craftsmanship we put into every product we supply.

We hope that you find the perfect range for your home in this brochure and we look forward to welcoming you as a customer of Heritage Products.

Timber Sourcing

When you buy joinery products it's important to know that the timber you're buying has been sourced from responsibly managed forests.

Here at Heritage we spend time with our suppliers to ensure we understand that our timber has been legally harvested and wherever possible the forests are being managed under one of the leading certification schemes.

The majority of our raw materials are sourced from forests which are either PEFC or FSC certified, meaning you can feel confident in your purchase of Heritage products.

Looking Forward

Innovation is the lifeblood of any business and we strive to offer our customers the newest ideas and concepts. We design all of our products in house using state of the art 3D modelling software that allows us to create, test and improve potential products before we launch them to our customers.

We are constantly searching for new ideas to help you improve the home. We believe that good design doesn't need to be expensive. In fact quite the opposite. Many of our products are designed to allow you to achieve a look in your home whilst maintaining great value for money.

Our new stair cladding system is a great example of that ethos, allowing you to create a hardwood staircase from your existing flight at a fraction of the cost of a new stair.

UK Manufacturing

Wherever possible we manufacture our products in the UK, this allows us not only to keep close control on quality, but also means we can customise many of our products to suit your needs.

Should you require any bespoke work to be completed, whether it's custom size doors or tailored flooring, our UK manufacturing facilities allows us to complete your order quickly and efficiently.

Internal Ledged Doors

We manufacture a range of ledged doors in standard and custom sizes, available in rustic or prime grades. Our most popular door is the V-grooved ledged door sold with or without optional bracing pack. All our doors are a substantial 40mm thick overall, creating a strong stable door that will last you a lifetime.

We offer both our V Groove and Bead & Butt doors in a range of rear styles to increase the choice available. Whatever ledged door style you need Heritage Products will have a door to suit you.

Standard Ledged Doors Available in rustic or prime grades

Optional Stable Door

A Door Made Just For You

We'll make the exact door you want. Choose from either Bead & Butt or V Groove door planks and then add any of the optional extras below to create a door that is perfect for you.

Made to Measure

Sometimes standard just doesn't work, off the shelf just doesn't fit and you end up stuck. With Heritage's range of ledged doors that's not a problem. If our standard sizes don't work, we'll make any of our doors to your exact dimensions. Because we make all our doors right here in our factory in the UK, we'll get them to you fast, normally within a week. Better yet, our made to measure doors cost less than you might think!

Any of the options can also be modified if you need, from custom sized glass openings to ledges at specific points to match existing doors. In fact any variation you can think of, we can make for you. If you need a made to measure door then contact your local stockist and we'll provide you with a quote.

Internal Solid Oak Doors

We manufacture a range of custom sized 40 mm solid oak internal doors, ideal for the discerning home owner, or where you need a non standard size to fit an existing doorway. Every door is carefully made in our UK factory using traditional quality construction methods to create a door that will last for generations. For each door we can also provide a matching solid oak frame.

Solid oak doors are considerably heavier than mass produced doors, and this weight translates to a unique feeling of luxury and solidity as the door is used. The solid timber sections used highlights the timber grain in a way that veneered doors can never replicate. The result is that the character of the door shines through.

Contact your local stockist for pricing information on your new solid oak doors.

Finishing Options

Your new solid oak door has been made from selected pieces of oak. Each piece of timber will show pleasing characteristics, from differing grain pattern to knots in rustic doors that make each individual door completely unique. This depth of character is part of what makes these solid oak doors special and is something that you will never find in a mass produced engineered door.

To enhance and show off the beauty of your new doors they need to be finished appropriately. We recommend using a modern Hardwax style finishing system such as Osmo or Treatex which can also alter the shade of the door if desired. By finishing your door correctly you can bring the timber to life and make the most of your new solid oak doors.

External Feature Doors

Your external doors are one of the most important features of your home, welcoming you or your guests and providing a striking first impression. Heritage solid oak external doors take your home up to the next level and are expertly crafted by our team here in the UK from your choice of either prime or rustic grade oak.

Each door is made to order, exactly to your sizes and specifications. Shown below is a range of designs we offer but each can be tailored to suit you. Glass openings can be added or doors converted to stable doors. If you don't see a design you like we are also able to manufacture to your own design – we just need a simple sketch to work from! Contact your stockist today to find out more about your new solid oak external doors.

Door Construction

All our solid oak doors, whether internal or external are made to last for generations. We only use strong traditional mortice and tenon joints for lifelong stability and specially selected and kiln dried hardwoods. Each door is a generous 44mm thick as standard and is handmade by our team to your exact dimensions. For each door we can also manufacture a solid oak door frame made exactly to fit your new door.

Whilst we believe in using the correct construction methods, investment in the latest machinery keeps production lead times and most importantly costs to a minimum. This allows us to offer you a bespoke sized solid hardwood door at a very competitive price.

Step up to a solid hardwood door from Heritage products and make a grand statement in your home.

Stairparts Essentials

Essentials is our range of basic pine and oak stairparts, in the designs and options you want with the no frills prices you need. We source the highest quality joinery grades of Scandinavian pine and American White Oak, special kiln dried and then carefully machined to create a superb range.

Essentials covers all the main options from turned spindles and newels through to stop chamfered and fluted balusters. We use generous sized timber sections to offer 90mm newels and 58mm handrails as standard. To complete the range we also offer shaped handrail fittings and wall mounted handrail options.

Your staircase is a central feature of your home, with Heritage's Essentials range you can add style and quality without breaking the bank.

Stylish Choices

Essentials offers you a range of style options, whether you are looking to create a modern contemporary look or capture the elegance of a traditional stair. From the warmth and timeless appeal of a traditional turned spindle and newel through to the striking lines of fluted balusters there is a choice for everyone.

We've also covered all of the bases when it comes to installing your new stairparts. All of our spindles are available in the usual 900mm lengths for domestic use but we also stock 1100mm long for use on commercial projects. Most newels are available not just in normal versions but also a spigot version for use on top of existing posts that can't be removed as well as in half versions to finish your balustrade against a landing wall.

Glass Stairparts

Glass stairparts allow light to flood into your stairway and are a hugely popular option for the modern styled home. Our glass system uses un-grooved rails and polished glass brackets to convert your existing staircase to create a fresh and modern look.

Generous 8mm thick safety glass in staircase and landing with polished edges combines strength and flexibility to fit all normal staircase with a minimum of fuss. Prefinished rails mean that once the components are installed the job is finished. Let the light fill your home with Glass stairparts.

Stair Cladding

Create a stunning feature oak staircase without the expensive and mess of a brand new flight. Our unique stair cladding system allows you to convert your existing staircase to solid oak, easily and cost effectively. New treads and risers simply bond into place over the existing stairs, and we have packs to suit every shape of step from winders to bullnose bottom steps. You can even veneer the existing strings with our pregglued string veneers.

When you add in our new oak stair balustrade the effect is amazing, transforming your existing staircase into a superb centre point of your home. Make a step change with Heritage staircase cladding.

Simple Installation

Installing Stair Cladding is a satisfying job that is well within the capabilities of a competent DIYer. An average staircase can be completed easily over a weekend and the transformation is stunning, adding real style and value to your home.

To begin simply count the number of each shape of tread on your stairs and buy a matching tread pack to suit. Each tread pack is then trimmed to width and depth and bonded over your existing treads with the special adhesive. Strings can either be painted to contrast with the treads or you can use our specially designed oak veneers which are easily trimmed with scissors and pre-glued to bond into place.

Shown in dark oak oiled finish

Essentials Solid Oak Flooring

Solid oak flooring is a luxury feature in any home that adds warmth and value to your living space. Our Essentials solid oak flooring is perfect for creating that feature floor without breaking the bank. We use only quality American White Oak in a carefully selected rustic grade to bring out the natural character of the timber. Each piece is tongue and grooved on all four side for a strong installation and generous 15mm thick oak will last you a lifetime.

Choose from unfinished oak or the warm tactile hues of brushed and oiled timber. Either way, your new Essentials solid oak floor will give you a home to be proud of.

Engineered Flooring

Engineered flooring is a great option if you need to put oak flooring in an area where variations in temperature are more extreme, such as over underfloor heating. However most engineered floors use veneers that lose the character look of a solid oak floor so we have gone to great lengths to source veneers that retain that character. In addition all our boards are blocked in solid oak on the sides to give extra strength.

Each board is available in either unfinished for you to match to your existing décor or hand finished in a selection of oils and colours. Choose a Heritage engineered oak floor to finish off your home.

Mouldings

Mouldings are perfect problem solvers, creating a neat join between different surfaces. Heritage manufactures a range of mouldings to finish off your project.

We offer solid oak feature mouldings for door and flooring installations, in a wide choice of moulding profiles and sizes. Both our skirting and architrave ranges are available to purchase by the metre so you have as little waste as possible. Our softwood mouldings are ideally priced for completing a variety of projects and are made from joinery quality grades of Scandinavian pine.

Skirting & Architrave Matrix

Available in Oak
All sizes specified are in mm

	Ogee	Torus	Ovolo	Chamfer	Bullnose
20 x 75 Architrave	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
